PROFESSIONAL SUMMARY

Executive-level Software Architect and Engineering Director with over 15 years of leadership driving cloud transformation, enterprise software governance, and multi-team engineering strategies. Successfully managed \$20M+ technology budgets and scaled global engineering divisions.

PROFESSIONAL EXPERIENCE

VP of Enterprise Architecture — Global Enterprise Systems (2019 – Present)

- Spearheaded enterprise-wide cloud migration strategy across 4 business units, transitioning legacy monoliths to AWS cloud-native architecture.
- Directed 8 engineering managers and 60+ engineers across global teams, improving software delivery metrics by 300%.
- Established software architecture governance, security standards, and compliance protocols across enterprise data pipelines.

Lead Systems Architect — FinTech Capital Technologies (2013 – 2019)

- Designed event-driven distributed architecture handling \$5B+ in daily financial transactions using Kafka and Kubernetes.
- Mentored senior engineers, reduced architectural tech debt, and aligned technology roadmap with executive business goals.

TECHNICAL SKILLS & CORE COMPETENCIES

Leadership: Strategic Planning, Budgeting, Global Team Management, Vendor Relations

Architecture: Cloud Transformation, Event-Driven Systems, Distributed Infrastructure, Security Governance

Technologies: AWS, Kubernetes, Apache Kafka, Microservices, Enterprise Integration
